EDUCATION

B.Tech in Computer Science & Engineering

Poornima College of Engineering, Jaipur

Expected Graduation: 2028 | CGPA: 8.5+/10

TECHNICAL SKILLS

Languages: C++, C, Python

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, Modern C++

Tools: Linux, Git, GitHub, CMake, GDB, GCC, Clang, AddressSanitizer, Valgrind

PROJECTS

Thread-Safe Queue (C++20)

- Designed and implemented a generic thread-safe queue using `std::mutex` and `std::condition_variable`.
- Implemented a blocking producer-consumer interface with modern C++ concurrency primitives.
- Applied RAII principles for safe resource management.

Logger Library (C++20)

- Built a thread-safe logging library with multiple log levels.
- Supported synchronized console and file output.
- Used RAII and mutexes for reliable concurrent logging.

Config Parser (In Progress)

- Developing an INI-style configuration parser from scratch.
- Supporting typed configuration retrieval using templates.
- Leveraging `std::unordered_map` and `std::string_view` for efficient parsing.

Memory Tracker

- Overloaded global operator `new` and operator `delete`.
- Tracked dynamic memory allocations and deallocations.
- Improved understanding of C++ memory management internals.

RELEVANT COURSEWORK

Data Structures & Algorithms • Operating Systems • Computer Networks • Database Management Systems • Object-Oriented Programming

INTERESTS

Systems Programming • Backend Engineering • Distributed Systems • Modern C++ • Linux
